## Chairperson's Remarks

## Respected Shareholders,

I would like to welcome and extend my warm greetings to the shareholders dignitaries, representatives of regulatory bodies, observers, journalist friends and the employees of our company for accepting our invitation and participating with us self and virtually to the 26th Annual General Meeting of Prabhu Insurance Limited. We would like to express our heartfelt gratitude to all of you for your unwavering faith and sincere support in the company's journey so far in spite of various challenges. We hope that the cooperation and goodwill of the people will continue to move the company in the right direction in the days to come.

Reviewing the ups and downs faced during the operation of company, the management and all the employees working for the company have contributed for the betterment of the company. As a result, we have grown to this period. During this phase, we have been through the political instability along with the effects of devastating earthquake of 2072, the blockade during the same year, the global pandemic Corona virus (Covid-19) and its new variants, the subsequent lack of liquidity in the financial sector and the conflict between foreign importing and exporting countries have directly and indirectly affected us all. There is no doubt that the assessment of potential insurance risks and its moderate and optimal management is the key to the success of the insurance sector. I have noticed that the good governance and participatory transparent decisionmaking process within the company has deepened the relationship between the Board of Directors and the management.

In the midst of intense competition in the insurance sector, the entire Prabhu Insurance is striving to achieve sustainable and secure long-term goals by properly managing capital, claim payments, management expenses and business expansion. Currently, the market, customers, goals and objectives of the 20 non-life insurance companies in operation are almost the same. We have been managing the internal management of the company accordingly, with special emphasis on digital insurance services.

In this Fiscal Year 2077/78, the company has approved to distribute a total of 11.58 percent dividend, including 11 percent bonus shares and 0.58 percent cash dividend for tax purposes on the proposed bonus shares to the shareholders from the profits earned by earning a net profit of Rs. 223.5 million. Therefore, for acceptance we have submitted this proposal to this dignified assembly.

Finally, I would like to thank all the regulatory bodies that have guided us, the governmental and nongovernmental organizations along the private sector that have cooperated and assisted us. I would like to highly commend the esteemed shareholders for providing capital to this company, requesting them to keep the expectations and trust of the esteemed dignitaries in a high place and we ensure to secure your investment delivering fair returns. Special thanks to the management and all the staff who have always been active in moving this company to the pinnacle of progress on a daily basis. I would like to express my heartfelt gratitude to all our esteemed customers, without whom we would not exist. At the same time, we are determined to provide simple, easy and excellent insurance services by diversifying the services of the company by putting their convenience first. Thank You.

Management is responsible for the preparation and fair presentation of the financial statements in accordance with NAS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.
In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
Those charged with governance are responsible for overseeing the Company's financial reporting process.

## Responsibilities of Auditor for the audit of Financials Statements:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole, are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with NSAs we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## 2 Basis of Preparation

(a) Statement of Compliance

The Financial Statements have been prepared in accordance with the Nepal Financial Reporting Standards (NFRS) issued by the Nepal Accounting Standards Board (ASB), as per the provisions of The Institute of Chartered Accountants of Nepal Act, 1997. These confirm, in material respect, to NFRS as issued by the Nepal Accounting Standards Board. The Financial Statements have been prepared on a going concern basis. The term NFRS, includes all the standards and the related interpretations which are consistently used.
(b) Basis of Measurement

The Financial Statements have been prepared on the historical cost basis except for following Assets \& Liabilities which have been measured at Fair Value amount:
i. Certain Financial Assets \& Liabilities which are required to be measured at fair value
ii. Defined Employee Benefits
iii. Insurance Contract Liabilities which are required to be determined using actuarial valuation for Liability Adequacy Test (LAT).

Historical cost is generally Fair Value of the consideration given in exchange for goods \& services.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique."

In addition, for Financial Reporting purposes, Fair Value measurements are categorized into Level 1, or 2, or 3 based on the degree to which the inputs to the Fair Value measurements are observable \& the significance of the inputs to the Fair Value measurement in its entirety, which are described as follows:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical Assets or Liabilities that the entity can access at the measurement date;
- Level 2 - Inputs are inputs, other than quoted prices included within Level 1, that are observable for the Asset or Liability, either directly or indirectly; and
- Level 3 - Inputs are unobservable inputs for the Asset or Liability.
protecting your future.

## (c) Use of Estimates

The preparation of these Financial Statements in conformity with NFRS requires management to make estimates, judgements and assumptions. These estimates, judgments and assumptions affect the reported balances of Assets \& Liabilities, disclosures relating to Contingent Liabilities as at the date of the Financial Statements and the reported amounts of Income \& Expenses for the years presented. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Changes in estimates are reflected in the Financial Statements in the period in which changes are made and, if material, their effects are disclosed in the Notes to the financial statements.

## (d) Functional and Presentation Currency

These Financial Statements are presented in Nepalese Rupees (NPR) which is the Company's functional currency. All financial information presented in NPR has been rounded to the nearest rupee except where indicated otherwise

## (e) Going Concern

The financial statements are prepared on a going concern basis. The Board of Directors have considered a wide range of information relating to present and future conditions, including future projections of profitability, cash flows and capital resources while assessing the going concern basis. Furthermore, Board is not aware of any material uncertainties that may cast significant doubt upon Company's ability to continue as a going concern and they do not intend either to liquidate or to cease operations of it.

## (f) Changes in Accounting Policies

Accounting policies are the specific principles, bases, conventions, rules and practices applied by the Company in preparing and presenting financial statements. The Company is permitted to change an accounting policy only if the change is required by a standard or interpretation; or results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance, or cash flows.
(g) Recent Accounting Pronouncements

## 3 Significant Accounting Policies

This note provides a list of the significant policies adopted in the preparation of these Financial Statements.
(a) Property, Plant and Equipment (PPE)

## i) Recognition

Freehold land is carried at historical cost and other items of property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation when, it is probable that future economic benefits associated with the item will flow to the Company and it can be used for more than one year and the cost can be measured reliably.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it meets the recognition criteria as mentioned above. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

## ii) Revaluation

After recognition as an asset, lands and buildings whose fair value can be measured reliably, have been carried at revalued amount at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations are being performed to ensure that the fair value of a revalued asset does not materially differ from its carrying amount as at the reporting date. Valuation of the land and buildings are undertaken by professionally qualified valuers.

An increase in the carrying amount as a result of revaluation, is recognised in other comprehensive income and accumulated in equity under the heading of revaluation reserve. However, the increase is recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit and loss. A decrease in the carrying amount as a result of revaluation, is recognised in profit or loss. However, the decrease is recognised in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Additionally, accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred directly to retained earnings.

## Alternatively, accumulated depreciation can be increased proportionately as allowed by NAS 16

Difference between depreciation on the revalued carrying amount of the asset and depreciation based on the asset's original cost is transferred to retained earnings.

## iii) Depreciation

Depreciation on Property, Plant and Equipment other than Freehold Land i.e. the Company's Freehold Building, Plant \& Machinery, Vehicles \& Other Assets is provided on "Straight Line Method (SLM)/ Diminishing Balance Method (DBM)" based on Useful Life estimated by technical expert of the management.

The Assets Useful Life/ Rate of Depreciation and Residual Values are reviewed at the Reporting date and the effect of any changes in estimates are accounted for on a prospective basis.

Useful Life of Property, Plant and Equipment based on SLM/ DBM is categorised as stated below:

| List of Asset Categories | Useful Life <br> (In Years) for SLM | Rate of Depreciation <br> (In \%) for DBM |
| :--- | :---: | :---: |
| Land | Not Applicable | Not Applicable |
| Buildings | 60 | $5 \%$ |
| Leasehold Improvement | Lease Period | Lease Period |
| Furniture \& Fixtures | 10 | $25 \%$ |
| Computers and IT Equipments | 5 | $25 \%$ |
| Office Equipment | 5 | $25 \%$ |
| Vehicles | 10 | $20 \%$ |
| Other Assets | 8 | $25 \%$ |

## iv) Derecognition

An item of Property, Plant and Equipment is derecognized upon disposal or when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the disposal or retirement of an item of Property, Plant and Equipment is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.
protecting your future.

## v) Impairment

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the Asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pretax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. Assets that suffer an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. In case of such reversal, the carrying amount of the asset is increased so as not to exceed the carrying amount that would have been determined had there been no impairment loss.

## vi) Capital Work-In-Progress

These are expenses of capital nature directly incurred in the construction of buildings, major plant and machinery and system development which are to be capitalized. Capital Work in Progress would be transferred to the relevant asset when it is available for use. Capital Work in Progress is stated at cost less any accumulated impairment losses.

## (b) Intangible Assets

## i) Recognition

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in statement of profit or loss in the year in which the expenditure is incurred.

Subsequent expenditure on intangible assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

## ii) Amortization

The useful lives of intangible assets are assessed to be either finite or indefinite. An intangible asset shall be regarded as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected generate net cash inflow for the entity.

Amortisation is recognised in income statement on straight line method over the estimated useful life of the intangible assets or diminishing balance method from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit or loss.

Useful Life of Intangible Assets based on SLM/ DBM is categorised as stated below:

| List of Asset Categories | Useful Life <br> (In Years) for SLM | Rate of Depreciation <br> (In \%) for DBM |
| :--- | :---: | :---: |
| Softwares | 5 | $20 \%$ |
| Licences | Licence Period | Licence Period |
| Others (to be specified) |  |  |

## iii) Derecognition

An Intangible Asset is derecognised when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the derecognition is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.

## iv) Impairment of Assets

The Company assesses at each reporting date as to whether there is any indication that Intangible Assets may be impaired. If any such indication exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. An impairment loss is recognised in the Statement of Profit or Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

## (c) Investment Properties

Cost Model: Property that is held for rental income or for capital appreciaiton or both, is classified as investment property. Investment properties are measured initially at cost, including related transaction cost. It is subsequently carried at cost less accumulated depreciation. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

Land is carried at historical cost, however, buildings are depreciated over their estimated useful lives as mentioned above.

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of retirement or disposal.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to PPE, the deemed cost for subsequent accounting is the fair value at the date of change in use. If PPE becomes an investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

## OR

Fair Value Model: Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise, including the corresponding tax effect. The fair value of investment property is determined by an external, independent property valuer, having appropriate recognised professional qualification and recent experience in the location and category of property being valued. Alternatively, valuation can also be done by competent property valuer other than external independent valuator and such fact are to be disclosed."

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of retirement or disposal.
protecting your future.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to PPE, the deemed cost for subsequent accounting is the fair value at the date of change in use. If PPE becomes an investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

## (d) Cash \& Cash Equivalent

For the purpose of presentation in the Statement of Cash Flows, Cash \& Cash Equivalents includes Cash In Hand, Bank Balances and short term deposits with a maturity of three months or less.
(e) Financial Assets

## i) Initial Recognition \& Measurement

Financial Assets are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Assets at initial recognition. When Financial Assets are recognized initially, they are measured at Fair Value, plus, in the case of Financial Assets not at fair value through profit or loss, transaction costs that are attributable to the acquisation of the Financial Asset. Transaction costs of Financial Assets carried at Fair Value through Profit or Loss are expensed in the Statement of Profit or Loss.
ii) Subsequent Measurement
a) Financial Assets carried at Amortized Cost (AC)

A Financial Asset is measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income in these financial assets is measured using effective interest rate method.

## b) Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are measured at fair value and changes are taken to statement of other comprehensive income.

## c) Financial Assets at Fair Value through Profit or Loss (FVTPL)

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. These financial assets are measured at fair value and changes are taken to statement of profit or loss.

## iii) De-Recognition

A Financial Asset is derecognized only when the Company has transferred the rights to receive cash flows from the Financial Asset. Where the Company has transferred an Asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the Financial Asset. In such cases, the Financial Asset is derecognized. Where the Company has not transferred substantially all risks and rewards of ownership of the Financial Asset, the Financial Asset is not derecognized. Where the Company retains control of the Financial Asset, the Asset is continued to be recognized to the extent of continuing involvement in the Financial Asset.

## iv) Impairment of Financial Assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, there is
objective evidence of impairment as a result of one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a financial asset or a group of financial assets is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

## Expected Credit Loss for Impairment of Financial Assets is applicable after implementation of NFRS 9

In accordance with NFRS 9 "Financial Instrument", the Company uses "Expected Credit Loss' (ECL) Model, for evaluating impairment of Financial Assets other than those measured at Fair Value through Profit or Loss (FVTPL).

## Expected Credit Losses are measured through a loss allowance at an amount equal to:

The 12-months Expected Credit Losses (Expected Credit Losses that result from those default events on the Financial Instrument that are possible within 12 months after the reporting date); or Full Lifetime Expected Credit Losses (Expected Credit Losses that result from all possible default events over the life of the Financial Instrument)

For other assets, the Company uses 12 months Expected Credit Losses to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk Full Lifetime ECL is used.

## (f) Financial Liabilities

## i) Initial Recognition \& Measurement

Financial Liabilities are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Liabilities at initial recognition. All Financial Liabilities are recognized initially at Fair Value, plus, in the case of Financial Liabilities not at fair value through profit or loss, transaction costs that are attributable to the issue of the Financial Liability.

## ii) Subsequent Measurement

After initial recognition, Financial Liabilities are subsequently measured at amortized cost using the Effective Interest Method.

For trade and other payables maturing within one year from the date of Statement of Financial Position, the carrying amounts approximate Fair value due to short maturity of these instruments.

## iii) De-Recognition

A Financial Liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing Financial Liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the Statement of Profit or Loss.

## (g) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the Statement of Financial Position where there is legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.
protecting your future.

## (h) Reinsurance Assets

Reinsurance assets are the assets which are created against insurance contract liabilities of the amount which are recoverable from the reinsurer. These assets are created for the resinsurer's share of insurance contract liabilities.

A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after the initial recognition of the reinsurance asset, that the Company may not receive all amounts due to it under the terms of the contract, and the event has a reliably measurable impact on the amount that the company will receive from the reinsurer. If a reinsurance asset is impaired, the company reduces the carrying amount accordingly and is recognized in statement of profit or loss.

## (i) Share Capital

Financial Instruments issued by the Company are classified as Equity only to the extent that they do not meet the definition of a Financial Liability or Financial Asset.

## (j) Reserves and Funds

i) Share Premium: If the Company issues share capital at premium it receives extra amount other than share capital such amount is transferred to share premium. The amount in share premium is allowed for distribution of bonus shares.
ii) Insurance Fund: The Company has allocated insurance fund for the amount which is $50 \%$ of the net profit every year as per Regulator's Directive.
iii) Catastrophe Reserves: The Company has allocated catastrophe reserve for the amount which is $10 \%$ of the distributable profit for the year as per Regulator's Directive.
iv) Fair Value Reserves: The Company has policy of creating fair value reserve equal to the amount of Fair Value Gain recognized in statement of other comprehensive income as per regulator's directive.
v) Regulatory Reserves: Reserve created out of net profit in line with different circulars issued by Insurance Board.
vi) Actuarial Reserves: Reseserve against actuarial gain or loss on present value of defined benefit obligation resuting from, experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred); and the effects of changes in actuarial assumptions.
vii) Cashflow Hedge Reserves: Is the exposure to variability in cash flows that is attributable to a particular risk associated with all or a component of a recognized asset or liability or a highly probable forecast transaction, and could affect profit or loss. Reserve represent effective portion of the gain or loss on the hedging instrument recognized in other comprehensive income.
viii) Revaluation Reserves: Reserve created against revaluation gain on property, plant \& equipments \& intangible assets, other than the reversal of earlier revalaution losses charged to profit or loss.
ix) Other Reserves: Reserve other than above reserves, for e.g. deferred tax reserve, others (to be specified)

## (k) Insurance Contract Liabilities

## i) Provision for unearned premiums

Unearned premiums reserve represents the portion of the premium written in the year but relating to the unexpired term of coverage.

Change in reserve for unearned insurance premium represents the net portion of the gross written premium transferred to the unearned premium reserve during the year to cover the unexpired period of the polices.

## ii) Outstanding claims provisions

Outstanding claims provisions are based on the estimated ultimate cost of all claims incurred but not settled at the statement of financial position date, whether reported or not, together with related claims handling costs.

## iii) Provision for claim incurred but not reported (IBNR)

Significant delays are experienced in the notification and settlement of certain types of claims, the ultimate cost of which cannot be known with certainty at the statement of financial position date.

The liability is calculated at the reporting date using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation.

## Liability adequacy

At each reporting date, the Company reviews its unexpired risk and a liability adequacy test is performed to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums. The calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant non-life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognized in the statement of profit or loss by setting up a provision for liability.

## (I) Employee Benefits

## i) Short Term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the Statement of Financial Position.

## ii) Post - Employment Benefits

- Defined Contribution Plan

The Company pays Provident Fund contributions to publicly administered Provident Funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contribution are recognized as Employee Benefit Expense when they are due.

## - Defined Benefit Plan

For Defined Benefit Plan, the cost of providing benefits is determined using the Projected Unit Credit Method, with Actuarial Valuations being carried out at each Statement of Financial Position. Actuarial Gains \& Losses are recognized in the Other Comprehensive Income in the period in which they occur. Past service cost is recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a Straight Line Basis over the average period until the benefits become vested. The retirement benefit obligation recognized in the Statement of Financial Position represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, as reduced by the Fair Value of plan Assets (If Any). Any Asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the plan.
protecting your future.

## iii) Long Term Employee Benefits

The liabilities for un-availed earned leaves are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. Leave Encashment has been computed using Actuarial Assumptions and these are measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the year using the Projected Unit Credit Method. The benefits are discounted using the market yields at the end of the year that have terms approximating to the terms of assumptions.

## iv) Termination

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary retirement in exchange of these benefits. The Company recognises termination benefits at the earlier of the following dates:
a) when the Company can no longer withdraw the offer of those benefits; and
b) when the entity recognises costs for a restructuring that is within the scope of NAS 37 and involves the payment of termination benefits.

The termination benefits are measured based on the number of employees expected to accept the offer in case of voluntary retirement scheme.

## (m) Revenue Recognition

## i) Gross Earned Premiums

Gross Earned Premiums are arrived at after deducting unearned premium reserves from Direct Premium and Faculative Inward Premium. Direct premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the reporting period. They are recognised on the date on which the policy commences.

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

## ii) Reinsurance Premium

Direct Reinsurance premiums comprise the total premiums payable for the whole cover provided by contracts entered into the period and are recognized on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks- attaching contracts and over the term of the reinsurance contract for losses occurring contracts.

Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net claims, respectively, because this is consistent with how the business is managed.

## iii) Commission Income

Commission Income is recognised on accrual basis. If the income is for future periods, then they are deferred and recognised over those future periods.

## iv) Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established

## v) Net realised gains and losses

Net realised gains and losses recorded in the statement of profit or loss include gains and losses on financial assets and properties. Gains and losses on the sale of investments are calculated as the difference between net sales proceeds and the original or amortised cost and are recorded on occurrence of the sale transaction.

## (n) Product Classification

nsurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. Insurance contracts can also transfer financial risk.

The Company has following portfolios under which it operates its business:

## (o) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in statement of profit or loss in the period in which they are incurred.

## (p) Cash Flow Statement

Cash Flows are reported using the direct method, whereby major classes of cash receipts and cash payments are disclosed as cash flows.
(q) Leases

## Finance Leases

Leases in which the Company has substantial portion of the risks and rewards of ownership are classified as Finance Leases. Assets acquired under Finance Leases are capitalised at the lower of the Fair Value of the Leased Assets at the inception of the Lease Term \& the Present Value of Minimum Lease Payments. Lease Payments are apportioned between the Finance charge and the reduction of the outstanding liability. The Finance Charge is allocated to periods during the Lease Term at a constant periodic Rate of Interest on the remaining balance of the liability.

## Operating Lease

Leases in which the Company doesn't have substantial portion of the risks and rewards of ownership are classified as Operating Leases. Payment made under Operating Leases are charged to Statement of Profit \& Loss on a Straight Line Basis.
(r) Income Taxes

Income Tax Expense represents the sum of the tax currently payable \& Deferred Tax.

## i) Current Tax

Current Tax Expenses are accounted in the same period to which the revenue and expenses relate. Provision for Current Income Tax is made for the Tax Liability payable on Taxable Income after considering tax allowances, deductions and exemptions determined in accordance with the applicable tax rates and the prevailing tax laws.

## ii) Deferred Tax

Deferred Tax is recognized on temporary differences between the carrying amounts of Assets \& Liabilities in the Statement of Financial Position and their Tax Base. Deferred tax Assets \& Liabilities are recognized for deductible and taxable temporary differences arising between the tax base of Assets \& Liabilities and their carrying amount in Financial Statements, except when the Deferred Income Tax arises from the initial recognition of goodwill, an Asset or Liability in a transaction that is not a business combination and affects neither accounting nor taxable Profits or Loss at the time of the transaction.

Deferred Tax Assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible Temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

Deferred Tax Liabilities are generally recognized for all taxable Temporary differences.
The carrying amount of Deferred Tax Assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the Deferred Tax Asset to be utilized.

## (s) Provisions, Contingent Liabilities \& Contingent Assets

## (i) Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate to determine the present value is a PreTax Rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Provisions for Contingent Liability are recognized in the books as a matter of abundant precaution and conservative approach based on management's best estimate. However, Management believes that chances of these matters going against the company are remote and there will not be any probable cash outflow.

## (ii) Contingent Liabilities

Contingent liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

## (iii) Contingent Assets

Contingent assets where it is probable that future economic benefits will flow to the Company are not recognized but disclosed in the Financial Statements.

## (t) Foreign Currency Transactions

The Financial Statements of the Company are presented in Nepalese Rupees, which is the Company's Functional Currency. In preparing the Financial Statements of the Company, transactions in currencies other than the Company's Functional Currency i.e. Foreign Currencies are recognized at the rates of exchange prevailing at the dates of the transactions.

## (u) Earnings Per Share

Basic Earning per share is calculated by dividing the profit attributable to owners of the company by the Weighted Average Number of equity shares outstanding during the Financial Year.

For diluted earning per share, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares.

## (v) Operating Segment

Operating Segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (CODM) as defined by NFRS 8, "Operating Segment".

Company's Income \& Expenses including interest are considered as part of un-allocable Income \& Expenses which are not identifiable to any business segment. Company's Asset \& Liabilities are considered as part of un-allocable Assets \& Liabilities which are not identifiable to any business.

(ii) Contractual obligations: Refer note no. 54 For disclosure of contractual obligations relating to investment properties.
(iii) There are no restrictions on the realisability of investment properties or proceeds of disposal.
(iv) Fair value of investment properties:

The fair values of the investment properties were determined by external independent qualified valuers using Comparison/ Development/ Other (specify the name) Method.

## Comparision Method:

This approach considers the sales of similar or substitute properties and related market data, and establishes a value estimate by adjustments made for differences in factors that affect value. In general, the investment properties are compared with sales of similar properties that have been transacted in the open market. Listings and offers may also be considered.

Development Method:
When a property to be valued is fairly big and no data available from similar land but sales transaction of small plots are available, on the basis we may adopt the method of development. In this method, the properties which are in the undeveloped stage or partly developed and partly undeveloped stage, the total land is divided into number of plots after providing for roads, parks etc. In such cases, the probable selling price of divided plots, the area required for roads, parks etc and other expenses for development should be known in such a way that the similar facilities and conditions are maintained to match with the available surrounding units for compensation.

## 45 Insurance Risk

Insurance risk includes the risk of incurring higher claims costs than expected owing to the random nature of claims, frequency and severity and the risk of change in the legal or economic conditions of insurance or reinsurance cover. This may result in the insurer having either received too little premium for the risks it has agreed to underwrite and hence has not enough funds to invest and pay claims, or that claims are in excess of those expected.

The Company seeks to minimise insurance risk through a formalised reinsurance arrangement with an appropriate mix and spread of business between classes of business based on its overall strategy. This is complemented by observing formalised risk management policies.

The Company considers insurance risk to be a combination of the following components of risks:
a) Product development
b) Pricing
c) Underwriting
d) Reinsurance
e) Claims Handling
f) Reserving
a) Product development:

The Company principally issues the following types of Non-Life Insurance contracts:

- Fire
- Motor
- Marine
- Engineering
- Micro
- Aviation
- Cattle and Crop
- Miscellaneous

The significant risks arising under the Non-Life Insurance portfolio emanates from changes in the climate leading to natural disasters, behavioral trends of people due to changing life styles, the steady escalation of costs in respect of spares in the auto industrys.

The above risk exposure is mitigated by the diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits.

Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are put in place to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business.
b) Pricing:

The pricing of an insurance product involves the estimation of claims, operational and financing costs and the income arising from investing the premium received. The pricing process typically comprises collecting data on the underlying risks to be covered, determining the pricing assumptions and the base rate, setting the final premium rate, and monitoring the review of the appropriateness of pricing.

The Company collects adequate data to validate the reasonableness of the underlying assumptions used for pricing. The base rate represents the amount required to meet the value of anticipated benefits, expenses, and margins for risks and profit. Data primarily relates to the company's own historical experience and that of the industry where relevant. These may be supplemented by other internal and external data, and could include trends observed in claims costs and expenses.

Pricing is done by modelling all identified risks, using appropriate methodologies depending on the complexity of the risks and available data. Adequate buffers are kept in the premiums to cushion against the risk that actual experience may turn out to be worse than expected.
c) Underwriting:

The Company's underwriting process is governed by the by the internal underwriting procedures. Some of the actions undertaken to mitigate underwriting risks are detailed below:
protecting your future.
i) Investments are made on the training and development of underwriting and claims management staff, including those attached to the distribution network.
ii) Application of Four-Eye principle on underwriting process.
iii) Pre-underwriting inspections are made on new business over a predetermined threshold to evaluate risk prior to acceptance
iv) Post-underwriting reviews are conducted to ensure that set guidelines have been observed.
v) Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers

## d) Reinsurance

The Company purchases reinsurance as part of its risks mitigation programme. Premium ceded to the reinsurers is in accordance with the terms of the programmes already agreed based on the risks written by the insurance companies. Recoveries from reinsurers on claims are based on the cession made in respect of each risk and is estimated in a manner consistent with the outstanding claims provisions made for the loss. Although we mitigate our exposures through prudent reinsurance arrangements, the obligation to meet claims emanating from policy holders rests with the Company. Default of reinsurers does not negate this obligation and in that respect the Company carries a credit risk up to the extent ceded to each reinsurer.
e) Claims handling:

Some of the actions undertaken to mitigate claims risks is detailed below:
i) Claims are assessed immediately.
ii) Assessments are carried out by in-house as well as independent assessors / loss adjustors working throughout.
iii) The service of a qualified independent actuary is obtained annually to assess the adequacy of reserves made in relation to Incurred But Not Reported (IBNR) and
iv) Incurred But Not Enough Reported (IBNER) claims.
v) Post-underwriting reviews are conducted to ensure that set guidelines have been observed.
vi) Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers

## Sensitivities

The non-life insurance claim liabilities are sensitive to the key assumptions as mentioned in the table below.
The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and profit after tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis.

## 46 Fair Value Measurements

(i) Financial Instruments by Category \& Hierarchy

This section explains the judgements and estimates made in determining the Fair Values of the Financial Instruments that are (a) recognised and measured at fair value and (b) measured at Amortised Cost and for which Fair Values are disclosed in the Financial Statements.

To provide an indication about the reliability of the inputs used in determining Fair Value, the Company has classified its financial instruments into Three Levels prescribed as per applicable NFRS

| Particulars | Level | Current Year |  |  | Previous Year |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Level 2: Fair Value of Financial Instruments that are not traded in an active market is determined using valuation techniques which maximises the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to determine Fair Value of an instrument are observable, the instrument is included in Level 2.
Level 3 : If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.
There is no transfer of Financial Instruments between different levels as mentioned above during the year.
(ii) Valuation Technique Used to Determine Fair Value
a) Use of quoted market prices or dealer quotes for similar instruments
b) Fair Value of remaining financial instruments is determined using discounted cash flow analysis
(iii) Valuation Process

The finance and accounts department of the Company performs the valuation of financial assets and liabilities required for financial reporting purposes. Discussion on valuation processes and results are held at least once in a year.

The main level 3 inputs are derived and evaluated as follows:
a) Discount rate is arrived at considering the internal and external factors.
b) Discounting has been applied where assets and liabilities are non-current, and the impact of the discounting is material

## 47 Financial Risk Management

The Company's activities expose it to Credit Risk, Liquidity Risk \& Market Risk.

## i) Credit Risk

Credit risk is the risk of financial loss as a result of the default or failure of third parties to meet their payment obligations to the Company. Thus, for an insurance contract, credit risk includes the risk that an insurer incurs a financial loss because a reinsurer defaults on its obligations under the reinsurance contract.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:
a) Company has credit risk policy which sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.

b) Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by entering into agreement with more than one party. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.
c) The company deals with only creditworthy counterparties and obtains sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults.

यस कम्पनीको सज्चालनका क्रममा आएका आरोह अवरोहहरूको समिक्षा गर्दा यो स्थानसम्म आइपुप्नका लागि कम्पनीका शेयरधनीहरू, सज्चालक समिति, व्यवस्थापन तथा कम्पनीमा कार्यरत सम्पूर्ण कर्मचारीहरूले कम्पनीको सर्वोपरी हितको लागि पुय्याएको योगदानको कारण कम्पनी आजको अवस्थामा आईपुगेको छ। यसै अवधिमा हामीले देशको राजनैतीक उत्तारचढावका साथै बि.सं.२०७२ सालको महाभूकम्प, सोही वर्षको नाकाबन्दी, बिश्वव्यापी महामारीको रुपमा फैलिएको कोरोना भाईरस (कोभिड १९) र सो को नयाँ/नयाँ भेरियन्टको असर, तत्पश्चात बित्तिय क्षेत्रमा देखिएको तरलताको अभाव एवं प्रत्यक्ष आयात निर्यात हुने बिदेशी राष्ट्रहरूबीच भएको आपसी द्वन्द लगायतले हामी सबैलाई प्रत्यक्ष तथा अप्रत्यक्ष रुपमा असर पोरेका छन् । सम्भावित बीमा जोखिमहरूको आँकलन तथा सोको संयमित र अनुकुलित व्यवस्थापन नै बीमा क्षेत्रको सफलताको शुत्र हो भन्नेमा कसैको दुई मत हुन सक्दैन। कम्पनी भित्रको शुसाशन र सहभागितामूलक पारदर्शी निर्णय प्रकृयाहरूले सज्चालक समिति र व्यवस्थापन बीचमा भन् प्रगाढता बढेको मैले महशुस गरेको छु।

बीमा क्षेत्रमा रहेको तीव्र प्रतिस्पर्धाका बीच पूँजी, दावी भुक्तानी, व्यवस्थापन खर्च र व्यवसाय विस्तारलाई समुचित व्यवस्थापन गरी दिगो तथा सुरक्षित दीर्घकालिन लक्ष्य प्राप्तीका लागि समस्त कम्पनी परिवार प्रयत्नशील रहेको छ। हाल सज्चालनमा रहेका २० वटा निर्जीवन बीमा कम्पनीहरूको बजार, ग्राहक, लक्ष्य, उद्देश्य लगभग एकै किसिमका छनु, यस्तो अवस्थामा कम्पनीले प्रतिश्पर्धा गर्न ग्राहक केन्द्रित भएर आकर्षक बीमा सेवा प्रदान गर्दे अगाडि बढेका छौ। हामीले कम्पनीको आन्तरिक व्यवस्थापनलाई सोही अनुसार व्यवस्थापन गर्दे आएका छौं, डिजिटल बीमा सेवामा बिशेष जोड दिएका छौ।

यस समिक्षा वर्ष २०७७/०७८ मा कम्पनीले रु.२२ करोड ३५ लाख खुद मुनाफा आर्जन गरी आर्जित मुनाफाबाट शेयरधनीहरूलाई ?? प्रतिशत बोनश शेयर र प्रस्तावित बोनश शेयरमा लाग्ने कर प्रयोजनको लागि ०.५८ प्रतिशत नगद लाभांश समेत गरि जम्मा ११.५८ प्रतिशत लाभांश वितरण गर्न स्वीकृतिका लागि यस गरीमामय सभा समक्ष प्रस्ताव पेश गरेका छौ।

अन्तमा, हामीलाई मार्ग निर्देश गर्नु हुने सम्पूर्ण नियामक निकायहरू, सहकार्य र सहयोग गर्नुभएका सरकारी तथा गैरसरकारी संघ संस्थाहरू र निजी क्षेत्रलाई कृतज्ञताका साथ धन्यवाद दिन चाहन्छु। आदरणीय शेयरधनी महानुभावहरूको अपेक्षा र विश्वासलाई उच्च स्थानमा राखी उचित प्रतिफल र लगानीको सुरक्षामा प्रतिवद्ध रहेको अनुरोध गर्दै यो कम्पनीलाई पूँजी प्रदान गरी दिनु भएकोमा यहाँहरूको उच्च कदर गर्न चाहन्छु। यस कम्पनीलाई दैनिक रुपमा नै प्रगतिको शिखरमा अगाडि बढाउन हरदम सक्रिय रहनु हुने व्यवस्थापन तथा सम्पूर्ण कर्मचारीहरूलाई विशेष धन्यवाद दिन चाहन्छु। हाम्रा अति आदरणीय ग्राहकहरू, जो विना हाग्रो अस्तित्व नै छैन, उहाँहरू सबैमा हार्दिक आभारका साथ धन्यवाद व्यक्त गर्न चाहन्छु। साथै उहाँहरूको सुविधालाई पहिलो प्राथमिकतामा राखेर कम्पनीको सेवाहरू विविधिकरण गर्दे सरल, सहज र उत्कृष्ट बीमा सेवा प्रदान गर्ने अठोट गर्दछौ।
